

Longwall Salvage Pack Hire

INORAiL Pty Ltd

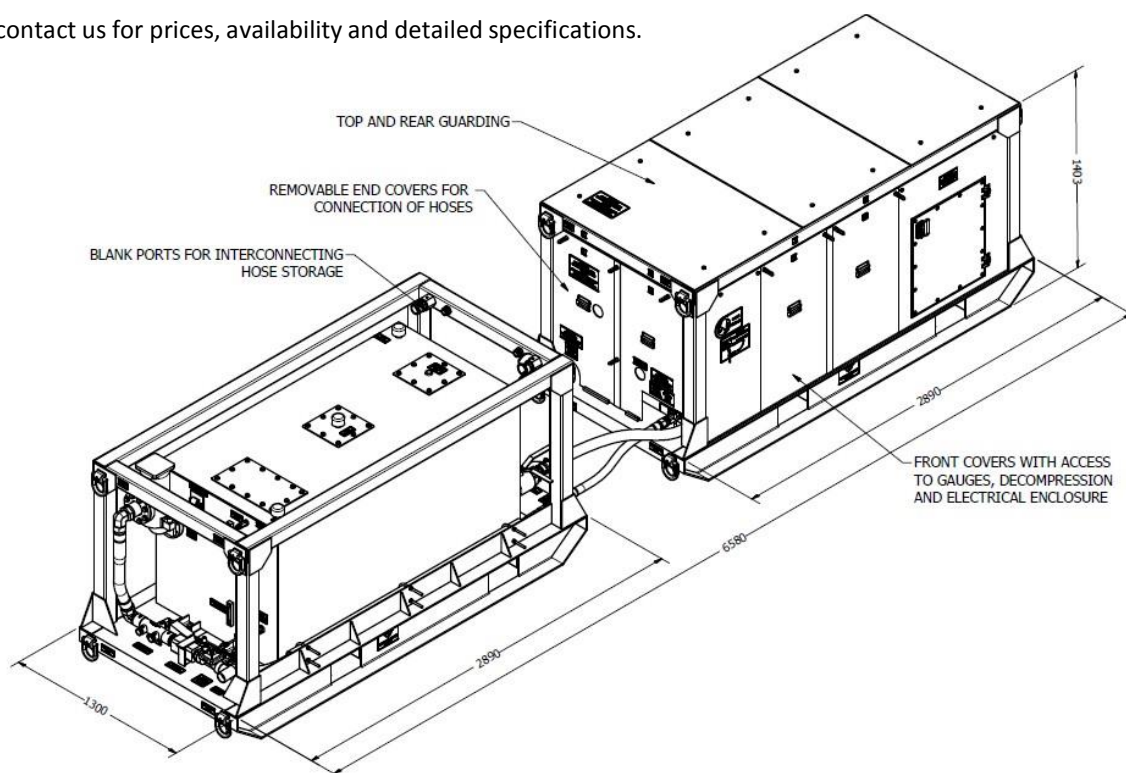

INORAiL is pleased to offer a self-contained intrinsically safe Longwall salvage pack fully compliant for hire in New South Wales or Queensland.

Fitted with a FLP 75kW, 1000 volt motor and starter, coupled to our INORAiL PM190 pump capable of 77 L/m @ 350bar. Full machine status PLC monitoring, utilising a user friendly IS condition monitoring system with remote stop and safety dump valve.

To accompany the pump skid is the 2000 litre tank skid, fitted with fill control and return filtering to safeguard the pump. Both skids are MDG41 compliant, with forklift truck slots and lifting lugs to facilitate safe transportation.

This pack comes complete with all safety documentation, and if required training and assistance through INORAiL service engineers.

Please contact us for prices, availability and detailed specifications.
